

## Crop Guide

# WAXY CORN

### • Land Preparation

- » Narrow paths help with irrigation and drainage
- » 45,400 plants/hectare (adjust according to the variety and season)

ENGLISH

## • Sowing

- » Plant 1-2 seeds per space (thin to one plant when 4" tall)
- » If one seed per space, prepare a tray of seedlings to top of empty spaces

## • Fertilizer Application

Recommended amount based on crop optimum nutrient requirement and plant population of 45,400 per hectare. Adjust application according to season, soil conditions and plant growth status.

## • Integrated Pest Management

- » Use sticky traps to monitor and mass trap insect pests

To prevent infection from spreading, sick plants, old crops and weeds must be removed and destroyed.

Crop rotation prevents build up of insect pests and diseases and restores soil fertility.

# • Integrated Pest Management and Safe Use of Pesticides

- » Alternate MoA groups to prevent resistance
- » Always read pesticide label and intended use (registered crop and pest)

## Kinds of Insects
