

EAST-WEST SEED

CONTAINER GARDENING Technical Guide

- Sample set-up

- Sample containers to use

Recycled containers

Ready-made or Do-It-Yourself (DIY) containers

• Preparation, planting and management

1. Choose crop (based on home consumption)

2. Grow seedlings

Heat for 10 minutes or place in full sun for half day

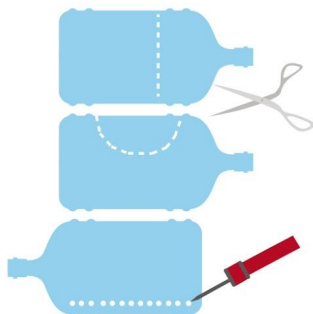

Direct sowing: leafy vegetables (e.g. kangkong, pakchoy, caisim); legumes and okra

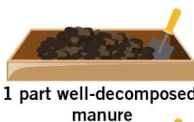

Sowing in trays/containers:

- Cucurbits (e.g. bitter gourd, cucumber) : 8-10 days before transplanting
- Solanaceous (e.g. tomato, eggplant): 21-28 days before transplanting

3. Prepare containers

Cut and make holes

Fill with potting soil

Best Tip: Soil Depth

- 30 cm (minimum) = deep-rooted plants (ex. tomato, eggplant, bitter gourd)
- 20 cm (minimum) = shallow-rooted plants (ex. leafy)

• Preparation, planting and management

4. Transplant

Water immediately after transplanting.

5. Apply fertilizer, water regularly and put stakes

Add organic or inorganic

6. Protect from insect pests and diseases
